7z format. This worked for me. A: A similar problem occurred with IntelliJ IDEA 15, and turned out to be a problem with the plug-in: It has been fixed in the latest version, and in IDEA 15.1 (I used the 15.0.3 that is shipped with VMWare Tools 8.0.1). In IntelliJ IDEA 15.1 go to Settings/Plugins and disable the Encore Plugin to solve the problem. Q: "_Pythonexit" hook in rpython In python, I can add a hook called "_Pythonexit" that runs as soon as the python process dies. I've been looking for a way to do this in rpython, and the closest I've found is this: However, the description of that hook mentions: This hook must be run in a thread different from the main thread, because that is where the Python interpreter exists. I'm not sure if that's what I'm running into. If I'm seeing the normal Python interpreter exit because I get a SIGTERM, how do I add a hook to that interpreter that runs at the end? I have been looking for something like that for a long time, and I can't find it, so I have implemented it myself: ABC's new animation series The Drifter just became the highest-rated new show in network history, leaping ahead of ABC's The Muppets. With a total viewership of 2.50 million, The Drifter was up 75% in the demo versus The Muppets (1.59 million, with a 1.0 rating), according to Nielsen live-plus-same-day data. Also Read: ABC's 'The Drifter' Teases Rocket-Filled Teen Romance "I'm totally obsessed with this show," wrote Drifter creator Seth Green in the title sequence to his Twitter account. The Drifter also easily edged Fox's Gifted (1.25 million, 1.82157476af
