I'm using roles.php for my project, and i'm struggling a bit on how to export a role of it. It's not easy as it seems to me. A: function export(\$role) { include("roles.php"); \$roles = new roles(); \$roles->assign_roles(\$role); \$roles->assign_all_roles(true); \$roles->save(); return \$roles->roles; } Remember to make sure that the file is in the root of your project folder. This is part of the built-in functionality of the module and will give you the roles assigned to the role you want to export f678ea9f9e
